

Seven Reasons to use Pyware 3D in your Commercial Drill Design Business

- 1 3D is now offered in 3 Editions, affordable for any level of drill design need. 3D Basic, 3D Interactive, 3D Professional. Drill designers can now get started with 3D Basic for under \$350.
- 2 Drills created on 3D are compatible with a more director's software than all other drill design software programs combined. 3D is used by over 80% of marching bands in the U.S. alone.
- 3 3D is created and supported by Pygraphics with a full time programming and support staff working closely with commercial drill designers for over 25 years.
- 4 3D (Version 4.1 or greater) includes pop up Helpers to assist new users through the design process.
- 5 Included with each 3D Interactive and 3D Professional is a 3D Online Account. The account is used for seamless uploading and downloading of drills between you the Drill Designer, your customers, and their performers (or students). As a commercial drill designer, upload your published drills to your Commercial 3D Account. You can also upload your work in progress for collaborating with other designers and even your clients. Your Commercial Account is always displayed in the list of Commercial Account found in all 3D software product installations and demos worldwide. You can include sample drills in your account that have public access and are locked from printing and editing for everyone to see. Your customers can download their purchased drills directly into their 3D program; or, if they don't own 3D, they can use the 3D Director's Viewer (\$49.95). Performers (students) can also download the drills into our revolutionary drill teaching software called the "3D Performer's Practice Tools."
- 6 With the 3D Performer's Practice Tools, you can offer added value to your drill products as never before. Performers (students) download drills directly into their home installation of Performer's Practice Tools seamlessly from your Commercial 3D Account. The Performer's Practice Tools combines seven valuable tools for your customer's performers:
 - " The "Personalized Drill Book" prints a drill book with each set printed from the performer's perspective, a zoomed view of the set to the performer's location, paths from the previous set and to the next set, as well a coordinates of each set.
 - " The "Performance Simulator" for actually PRACTICING the drills at home using the Pyware March Pad (\$29.95) or the numeric keypad as a controller. Performances are scored based on step pulse and direction accuracy.
 - " The "Drill Explorer" is a viewer for learning complicated details of their personal performance as their position and paths are highlighted while the drill is animated to music.
 - " Pocket sized "Coordinate List" printout.
 - " "Thumbnail Charts" printout.
 - " Scale studies for playing and assessing.
 - " "Interactive Graphic Tuner" and "Metronome".
- 7 Performer's Practice Tools (PPT) is typically purchased individually by a performer or in a group by schools, but as a commercial drill designer, you can provide your customers with PPT as an added feature of your drill design product. Your customer does not need to own 3D in order to take advantage of this revolutionary technology!!! Include in your drill package a Performer's Practice Tools Group Installation Kit and provide each of your customer's performers a personal copy of PPT for home or school use.

How to enhance your products with Performer's Practice Tools (PPT)

- 1) You or your business must to own at least one installation of 3D Interactive or 3D Professional for uploading your published and custom drills.
 - a. be passed out to the performers. The setup page guides the performers (students) through the online installation and activation of PPT.
- 2) When you sell one of your drill products enhanced with the Performer's Practice Tools, contact Pygraphics at 800-222-7536 for a Performer's Practice Tools Group Installation Kit personalized for your customer. The kit is emailed directly to your customer leaving the technical side of setup and support to Pygraphics. You can also have the kit emailed to your business if you choose. The kit includes:
 - a. A printable document that is a PPT Setup Page to
 - b. A PPT Group Activation Code that is operational for one year.
 - c. Instructions for Directors to setup PPT installations at school for performers (students) that have no computer at home.
